- Created Pixel Sorting while still in school
- Creative Director at NETRO - 2014 till now
- Credited with creating/ popularizing pixel sorting
- Other works include: Extra file, composite pieces, and other programs/ bases for artists to use.

Artistic Process

Pixel Sorting is the method of separating a vertical or horizontal line of pixels in an image and sorting their positions into a different order.

Kim Asendorf's code applies the technique twice, with the pixels being sorted vertically and then horizontally

Uses Code to create a pixel sorting image

ASDF Pixel Sort (2010) is a processing script is used to sort pixels in images

It seems that he takes the images himself, that cannot be confirmed though
Mountain Tour

"A trip to the mountains in my head."
